

How to win back passenger confidence post COVID-19

Contact us to arrange your own personal webinar and how we can advise you.

- What is COVID19?
- How is it transmitted and how does it cause infection?
- What is the risk from the main surface areas within the cabin?
- How do different types of materials respond to Corona virus including Fabric, Leather, synthetic leather and plastics?
- What is the difference between Cleaning and Disinfection?
- How can you give your passenger a clean & sanitized pax place?
- What effect does airflow have on the passenger space?
- Why is the social distance metric six feet or 2 meters?
- Can we achieve it in an aircraft cabin?
- What does a mask do and how useful is it in reducing the risk?
- Can we find an engineering solution that reduces the risk to a level that passengers will accept without wearing masks and maintaining density?
