

# Sustainability Statement

Elevating the Passenger Experience

## Our Mission

At Tapis we are aligned with the global aviation industry goals of reducing its contribution to global Co2 emissions. As a future-focused company, we are committed to providing innovative materials that conserve resources and protect the wellbeing of people, planet, and future generations. With Sustainability at our core we're building on our strengths in product quality, material innovation, and transparency to enhance our leadership in social and environmental responsibility. Tapis' commitment to sustainability is fundamental to our values, mission and business strategy and our commitment to helping aid the Aviation industry towards meeting the carbon neutrality pledge to the world.

## Our Goals

- Have 100% of our stocked product offerings contain at least 50% recycled and/or renewable resources by 2030.
- Continue to develop light-weight, durable options that aid in carbon neutrality.
- Be an industry leader in providing material solutions that aid in reaching sustainability goals.

## Actions Taken:

- We worked with mill partner, Ultrafabrics, and Franklin products to develop a new seating material Atago. Atago is a lightweight seating material that saves up to 1 lb. per seat. This reduces fuel consumption and emissions on commercial aircrafts.
- Customized a commercial OSU complaint material that contains bio-based resins for a new airline customer flying in 2023.
- Of our 25 stocked product lines, 60% have either a plant-based or renewable attributes.
- Limited our stocked items to minimize our carbon footprint and product overhead.
- Offer products that are free of Bisphenol A (BPA), Conflict Minerals, Heavy Metal Stabilizers, PFOAs (Perfluorooctanoic Acid), Plasticizer Phthalates, POPs (Persistent Organic Pollutants), PVC (Polyvinyl Chloride).

## We partner with mills who share the same values, below are our certifications:

<b>Tapis:</b>	<b>Ultrafabrics:</b>	<b>Ultrasuede:</b>	<b>TapiSuede:</b>

## Future Promises:

We understand that sustainability is not a short and completable concept; rather a lifelong commitment to innovative concepts and product development to aid in the health of our customer and the planet. We will continue to evolve through extensive investment and research, adapt to changing environments and customer requirements, and we will uphold our values and beliefs through our manufacturing, customer service, and company representation. We thrive to lead improvement of environmental and social impact across the industry.
