

Recommended Cleaning Instructions for TapiSuede™

TapiSuede • TapiSuede Flannel • TapiSuede Stretch

Elevating the Passenger Experience

TapiSuede is easy care and machine-washable.

Unlike natural skins, TapiSuede is resistant to stains and if stains occur, they can be easily removed as follows:

Basic Cleaning Instructions:

- To remove light stains, brush with a suede brush.
- For sticky stains such as honey and sweets, use spoon or knife to remove.
- Avoid rubbing stains into the material.
- General stains can be removed with a dampened soft cloth.

If the stains persist, use the following cleaning method:

Liquid Stain (Coffee, Tea, Juice, Milk, Coke, Beer, Wine, Sauce, Ketchup, Ink, etc.)

- Blot the spot to remove excess liquid, remove the stains with cloth soaked in warm, sudsy water.
- Place a dry cloth on the reverse side to absorb excess water.
- Repeat until stain is removed and no soap remains.

Oil-Based Stain (Butter, Mayonnaise, Salad Oil, Lipstick, Cosmetic, Shoe Polish, Ball Point Pen, Marker, Machine Oil, etc.)

- Try the same thing as described for Liquid Stain.
- If the stain remains, gently rub the spot with a cloth dampened with alcohol or a dry cleaning agent.

This information is not a guarantee. Please use all cleaning and disinfecting agents safely and as instructed. The use of other cleaning agents, disinfectants, conditioners or protectants is not recommended as they can degrade fabric's performance.
