Cleaning Instructions for TapiSuede™ BHC-SSFL

TapiSuede is washable and dry-cleanable.

Machine Washing

- May be machine washed on delicate wash setting using a neutral detergent, at a maximum temperature of 30 degrees Celsius.
- Gently wring the material after washing. Wherever possible, avoid using a spin dryer.
- Hang the material out to dry in the shade, and avoid tumble drying.

Dry Cleaning

- Petroleum-based dry cleaning is recommended.

Unlike natural skins, Tapisuede is resistant to stains and if stains occur, they can be easily removed as follows:

- Most stains can be removed by a damp cloth and soap/water.
- To remove light stains, brush with a suede brush.
- Avoid rubbing stains into the material.
- General stains can be removed with a dampened soft cloth.

If the stains persist, use the following cleaning method:

Liquid Stain (Coffee, Tea, Juice, Milk, Coke, Beer, Wine, Sauce, Ketchup, Ink, etc.)

- Blot the spot to remove excess liquid, remove the stains with cloth soaked in warm, sudsy water.
- Place a dry cloth on the reverse side to absorb excess water.
- Repeat until stain is removed and no soap remains.
- If feasible, it can also be machine washed in cool water with a mild detergent or professionally dry-cleaned.
