Cleaning Instructions for TapiSuede™ BHC-SSFL

Unlike natural skins, Tapisuede is resistant to stains and if stains occur, they can be easily removed as follows:

- Most general stains can be removed with a dampened soft cloth and a combination of soap/water.
- To remove light stains, brush with a suede brush.
- Avoid excessive pressure, aggressive rubbing or scrubbing into the material.
- Do not oversaturate the material.

If the stains persist, use the following cleaning method:

For Liquid Stain *(Coffee, Tea, Juice, Milk, Coke, Beer, Wine, Sauce, Ketchup, Ink, etc.)*

- Blot the spot with a clean, dry cloth to absorb excess liquid; remove the stains with cloth soaked in warm, sudsy water.
- Repeat until the stain is removed and no soap remains.
- Blot with a clean, dry cloth to absorb excess moisture.
- If feasible, it can also be machine washed in cool water with a mild detergent.

For questions regarding cleaning products, persistent stains or specialized maintenance procedures, contact Tapis Corporation for more guidance.
